Exclusions Reference Tables

XCL1	Diagnosis
	SNOMED
	160734000

Reference Periods

START	STOP
12:00:01 AM	12:00:00 AM
01/01/2015	02/01/2015
Different criteria in each measure require that records occur during a precise time period. Note that all dates begin at midnight.

Operators

Operators describe what criteria is needed for a measure. They include:

AND

Both criteria above and below the line must be met

OR

Either criteria above or below the line must be met

NONE OF THE FOLLOWING

The criteria following this are negated — they must not have occurred

Expressions

You will encounter certain expressions that denote a specific relationship between criteria. They include:

Linked Encounter
Indicates that the criteria listed above must have occurred during the same encounter as the criteria that immediately follows

AND THEN ─────── ↻ **HAPPENS AFTER**

Indicates that the criteria must have occurred in a certain sequence. The criteria that follows must have occurred after the criteria listed above

AND THEN ─────── ↺ **HAPPENED PREVIOUSLY**

Reverse sequence — the criteria that follows must have occurred before the criteria listed above

PLUS ─────── ＋ **COUNT INSTANCES**

The first criteria specifies what must be on the patient record. The criteria below is then counted for that patient
